PROFESSIONAL EXPERIENCE

Data Analyst & Analytics Engineer, Paymentap

12/2023 – 10/2025

- Marketing & Growth Analytics: Engineered automated data pipelines to integrate fragmented datasets from GA4, CRM, and Ad platforms (Meta/Google Ads) using SQL and Python. Conducted RFM-based user segmentation and rigorous A/B testing, resulting in a 20% increase in Marketing ROI and a significant reduction in CAC through data-driven hypothesis testing.
- Scalable Data Architecture: Engineered robust end-to-end ELT pipelines using dbt and Airflow on BigQuery/Snowflake, automating complex data workflows. Reduced reporting latency by 70% and established a unified "Single Source of Truth," ensuring data consistency and governance across global departments.

Data Analyst, RedStone

2024 – 2025

- Formulated data-backed growth strategies for SMB SaaS and E-commerce clients by analyzing GA4 and Amplitude data. Translated complex funnel, cohort retention, and conversion metrics into actionable insights for non-technical stakeholders, identifying friction points in onboarding and checkout flows that directly informed product roadmaps and marketing optimizations.

Data Analyst (Freelance), Upwork

10/2023 – Present

TECHNICAL SKILLS

BI & Reporting

(Tableau, Looker, QuickSight, PowerBI)

Programming

(Python, R, SQL (PostgreSQL, SQL Server))

ETL/ELT & Processing

(Airflow, dbt, Airbyte, PySpark, Git)

Cloud Platforms

(AWS (Athena, Glue, RedShift, S3), BigQuery, Snowflake)

Web & Marketing Analytics

(Google Analytics & Google Ads & Amplitude)

PORTFOLIO

AWS End-to-End Data Analytics for SaaS

Why have conversions in our mobile app been declining for 6 months? Architected a scalable end-to-end ETL framework on Amazon S3 using Airbyte to integrate fragmented mobile app data from GA4, CRM, and Ad platforms. Engineered AWS Glue & Athena pipelines to transform and process 500k+ granular event logs, diagnosing a 6-month conversion decline. Delivered a QuickSight dashboard that identified critical drop-off points in the onboarding funnel, leading to data-driven UI/UX optimizations.

Optimizing Product Activation & Retention

What if they don't see? Utilized Amplitude to identify critical user activation triggers and 'Aha! Moments' for a subscription-based SaaS. Through behavioral cohort and correlation analysis, discovered that users failing to visualize data in the first session were 3x more likely to churn. Spearheaded the redesign of the onboarding flow based on these insights, achieving a 22% increase in activation rates and a measurable uplift in Day-7 retention.

E-Commerce Admin Dashboard

Can the administrator keep track of everything in one place? Developed a high-impact Tableau dashboard to centralize critical e-commerce KPIs, including Monthly Revenue Trends, AOV, and Category Performance. Engineered a multi-layered analysis tool that enables leadership to monitor inventory health and customer lifetime value (LTV), reducing decision-making time by providing granular insights into product-level profitability and stock status.

EDUCATION

Bachelors of Science, ANADOLU UNIVERSITY

Management Information Systems

CERTIFICATES

AWS Cloud Technical Essentials

Amazon Web Services

Visual Analytics with Tableau

University of California, Davis
