PROFESSIONAL EXPERIENCE

Data Analyst & Analytics Engineer, Paymentap

12/2023 – 10/2025

- Marketing & Growth Analytics: Integrated fragmented data from GA4, CRM, and various Ad platforms to conduct advanced user segmentation, A/B testing, and hypothesis testing, delivering strategic insights that optimized marketing ROI.
- Scalable Data Architecture: Engineered end-to-end ETL/ELT pipelines using dbt and Airflow to automate data processing workflows, minimizing reporting latency and establishing a "Single Source of Truth" across the organization.

Data Analyst, RedStone

2024 – 2025

- Provided product and marketing analytics consulting to SMB SaaS and E-commerce companies, analyzing GA4 and Amplitude data to evaluate funnel performance and user behavior.
- Conducted cohort retention and conversion analysis, identifying onboarding and checkout friction points and translating insights into data-backed growth recommendations.

Data Analyst (Freelance), Upwork

10/2023 – Present

TECHNICAL SKILLS

BI & Reporting

(Tableau, Looker, QuickSight, PowerBI)

Programming

(Python, R, SQL (PostgreSQL, SQL Server))

ETL/ELT & Processing

(Airflow, dbt, Airbyte, PySpark, Git)

Cloud Platforms

(AWS (Athena, Glue, RedShift, S3), BigQuery, Snowflake)

Web & Marketing Analytics

(Google Analytics & Google Ads & Amplitude)

EDUCATION

Bachelors of Science, ANADOLU UNIVERSITY
Management Information Systems

PORTFOLIO

AWS End-to-End Data Analytics for SaaS

Why have conversions in our mobile app been declining for 6 months? To answer this question, I implemented the following to create a continuously trackable solution: I integrated fragmented data from multiple sources (GA4, CRM, ADS) into Amazon S3 using Airbyte, creating a single, reliable source for analysis. Then, I created ETL pipelines with AWS Glue to clean and transform the raw data. I performed extensive SQL analysis using Amazon Athena. Finally, I visualized key findings in a dynamic dashboard with Amazon QuickSight, enabling continuous and easy tracking of business metrics. repeated the process daily.

Optimizing Product Activation & Retention

What if they don't see? To resolve the activation bottleneck in our subscription-based SaaS platform, I leveraged Amplitude to identify the critical 'Aha! Moment' that dictates long-term retention. By analyzing behavioral cohorts and event correlations, I discovered that users who fail to visualize their data within their first session are 3x more likely to churn. This led to the strategic mantra: 'If they don't see the value, we lose them.' By restructuring the onboarding flow based on these behavioral insights, I achieved a 22% surge in activation rates and a significantly uplifted Day-7 retention curve.

E-Commerce Admin Dashboard

Can the administrator keep track of everything in one place? A dynamic Tableau dashboard was developed that instantly tracks critical ecommerce metrics for business leaders, including Total Orders, Total Spend, Unique Customers, and Monthly Revenue Trend. The solution provides high-level summaries of top-performing customers and categories, while also offering a "Products" tab for in-depth analysis of individual product performance and inventory status.
